

Conferencing Technology Guide

Powered by Logitech

Logitech Sight + Rally Bar

With Rally Bar at the front of the room, and Sight at the center of the table, you maintain a consistent front-facing view of in-person interactions as the conversation flows between in-room and remote participants.

Logitech Sight

As we adapted to hybrid work, considerable effort was put into creating better sightlines and audio for remote participants. However, most hybrid technology wasn't also designed to support eye-to-eye contact among those in the room to create the best experience for everyone.

The Logitech Sight creates immersive equitable experiences for in-person and remote participants.

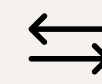

Video Capture

Sight uses video and AI to detect and accurately frame participants, with a 315° field of view.

Audio Pickup

Sight uses sound to detect active speakers and capture audio at the table, up to 7.5 ft away.

Smart Switching

Adaptive intelligence chooses the best view between the camera on the table and the camera at the front of the room, tracking conversations as they move between participants.

*Available with future software update

Logitech Room Solutions for Microsoft Teams

Logitech Room Solutions for Microsoft Teams include everything you need to build out meeting rooms of virtually any size or shape—a mini PC, a PC mount, an Ultra-HD Logitech conferencecam with RightSense™ technologies, and the Logitech Tap touch controller.

Logitech® room solutions are available in small, medium, or large configurations with accessories to suit each space.

VIDEO RightSight™

detects meeting participants, automatically moves the lens, and adjusts the zoom so no one is left out of the picture.

AUDIO

RightSound™

auto-levels loud and soft voices—while suppressing background noise—for outstanding conversational clarity.

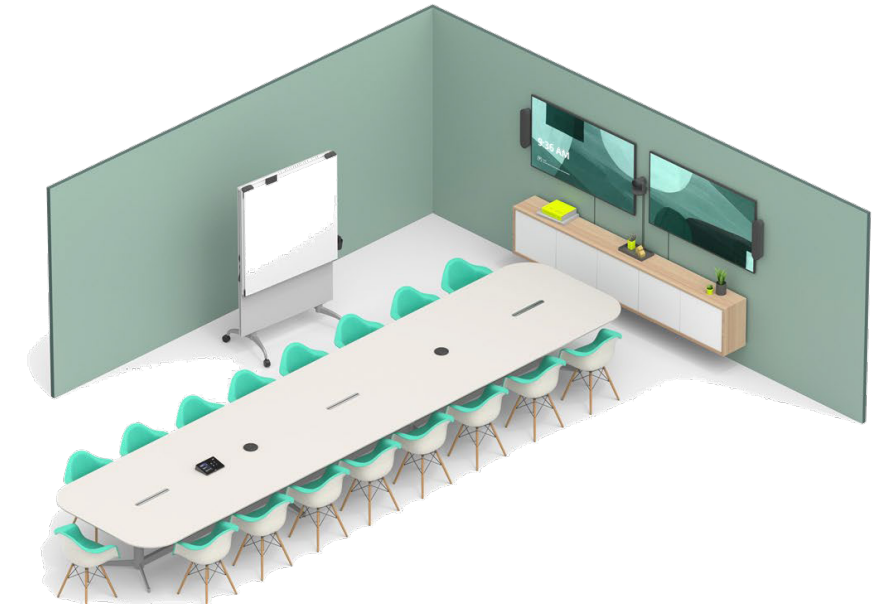

SMALL SPACES

The small room configuration with Logitech Rally Bar Huddle or Rally Bar Mini delivers superior audio and video in a compact, all-in-one form factor. Clean cabling and flexible mounting options allow you to confidently deploy at scale.

MEDIUM SPACES

Experience brilliant optics and room-filling audio with the medium room configuration with Logitech Rally Bar, an all-in-one video bar purpose-built for midsize rooms. Mount neatly to the display or wall, or stand on a credenza.

LARGE SPACES

Featuring the expandable Rally Plus conference camera system and Logitech RoomMate computing appliance with built-in Microsoft Teams Rooms software, the large room configuration combines easy management with outstanding coverage across a wide range of room sizes and layouts.

Choose Your Room System

Logitech Meeting Room Solutions

Complete Microsoft Teams room solutions from Logitech allow participants to quickly kick off and run a video conference meeting. Logitech RightSight™ camera control automatically moves and adjusts the lens to comfortably frame meeting participants in rooms of all shapes and sizes.

Medium Signature Teams Room

Creation Networks Concord WorkLife

What Happens Here

- Collaborate with local and remote users in an unparalleled immersive experience
- The Microsoft Front Row layout ensures everyone in the meeting, remote or in-person, is represented, included, and productive
- Connections become more natural through a face-to-face video gallery at the bottom of the screen in addition to providing equal access to the chat and hand raised feature
- Holds 7 local team members

Create natural sightlines:
Front Row shows everyone face-to-face in a horizontal view.

React/view the chat:
Chat maintains visual persistence to allow everyone to participate.

Focus on questions: Front Row highlights the raise hand feature to make sure questions are heard.
