

PROAV DESIGN GUIDE

## Flexible Conference Room

Mid-sized conference room for up to 12, built around a single Teams- or Zoom-certified appliance.

Reference layout: dual 65" displays + integrated video bar at the front, conference table for 12, touch controller on table, scheduling panel at door.

### Simplicity. Functionality. Built to scale.

The Flexible Conference Room fits mid-sized teams of up to 12 people in a room designed around simplicity and functionality. A certified appliance for Zoom or Microsoft Teams puts the computer, microphone, speaker, and camera into a single unit at the front of the room -easier to deploy, easier to support, and easier to scale across a fleet of similar rooms.

Native dual-display output unlocks extended gallery view, smart gallery, and wireless multi-share content side by side with remote participants. A Zoom- or Teams-certified controller on the table starts meetings from the room calendar or ad-hoc with one tap - no laptops, no cables to fish under the table.

A scheduling display at the door makes the room visible to the rest of the building: see availability, reserve on the fly, or jump into other open rooms. The full build is cabled simply with a 10 ft HDMI run to each display and Cat6 to the appliance and scheduler, keeping deployment fast and consistent.

### KEY FEATURES

Dual 65" Displays

Teams + Zoom Certified

All-in-One VC Appliance

Smart / Gallery Modes

Wireless Multi-Share

Door Scheduling Panel

#### FOOTPRINT

**20' x 35'**

700 sq ft  
Seats: up to 12
