

PROAV DESIGN GUIDE

## Work Cafe

Flexible 32-54 person space for all-hands, training, and collaboration events.

Reference layout. 85" primary, interactive 85" display and 138" DVLED display + mobile stand, with room presenter & audience cameras.

### One space, every configuration.

The Work Café is a mid-size multipurpose space designed to be an engaging destination for employees to socialize, dine, work independently or in groups. The space can also be easily reconfigured for larger events or company wide meetings.

Throughout the day, digital signage communicates company or industry news, interesting information or entertaining content on the 85" Interactive screen. Music is used to add a relaxing vibe to the space. The content is pre-scheduled but with the ability to select other local sources for display using the wall mount/wireless touch panel. The system also controls volume, lighting and shades.

During events or large meetings, the presenter can use the stylus to select content, applications and annotate at the interactive display or bring in a remote participant using the integrated Microsoft Teams for Business videoconferencing.
